Flexideck P-ML With Tile

The PolyTuff Flexideck P-ML Deck System, when correctly installed is an acceptable surface for the placement of outdoor floor tile and slate. When the Flexideck P-ML System is to be used as a substrate for outdoor floor and tile no PolyTuff top coat should be applied to the sand broadcast over the P-Tuff Classic. The setting bed for the tile or slate may be placed over the Flexideck P-ML System after the excess sand is thoroughly removed from the deck and a minimum of 90% coverage of sand remains on the surface of the P-Tuff Classic.

Please call 866.977.8833 if there are any questions regarding the Flexideck Systems.
