Slip Resistant Testing for Flexideck Systems

The standard of measurement does PolyTuff determine at the minimum Coefficient of Friction for both wet and dry horizontal surfaces and ramps. Surfaces Sealed with PolyTuff Flexideck Pedestrian and Traffic Grade Systems, when required aggregates are broadcast to refusal are tested to conform to ASTM F 1240 and to be equal or greater values than:

- Dry surfaces 1.2 COF (ADA requirement = 0.8 on ramps)

- Wet surfaces sealed 0.9 COF (ADA requirement = 0.6 or higher)\

- Dry surfaces sealed 1.2 COF (ADA requirement = 0.8 on ramps)

The product data sheets in the product data sheet section of the Poly-Tuff Binder or at www.polytuffus.com. Feel free to consult the related data sheet or call 866.977.8833 for further information.
